

Rolleicord Vb

With this versatile Rollei you have five picture formats in one camera — for roll and for miniature film. That means greater scope, more flexibility and no problems of picture size. That is what makes the Rolleicord V b so popular.

It is also a Rollei at an amazingly low price — a further point in favour of the Rolleicord V b. You first buy the basic outfit, and then extend it at any time later on — for instance with the Rolleilux, the accessory exposure meter combined with a lens hood.

You are no doubt familiar with the idea of the Rollei system from our colour catalogue "Rollei 2 1/4 x 2 1/4 inches — its assets and yours". This listing of features is a special supplement for it.

Rolleicord V b with Xenar f/3.5 lens	COXEN
