

## ROLLEIFLEX 2 1/4 x 2 1/4'' TWIN-LENS REFLEX CAMERAS

- **Reliable, Precise Performance**
- **Uncomplicated Operation**

Rollei offers professional quality, wide versatility and rugged, reliable construction for superior medium-format photography. Twin-lens design permits full-time viewing at full aperture—even at the moment of exposure. Each Rollei TLR automatically corrects for parallax and incorporates a Compur leaf shutter for synchronization at all speeds.

### ROLLEIFLEX 2.8F and 3.5F

Key features:

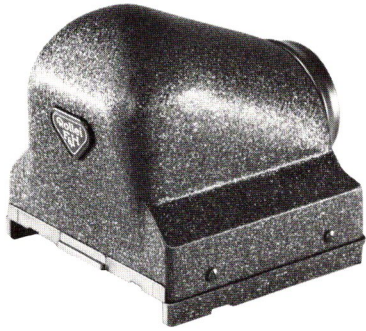

- **Schneider Xenotar Optics.** Air-spaced f2.8 and f3.5 Xenotars give superb contrast and resolution at all apertures to f22; focus to 3 feet.
- **Synchro-Compur Shutter.** Time-proven shutter offers speeds from 1 to 1/500th second plus 'B,' with exceptional accuracy at every speed.
- **Automatic Film Loading.** Insert roll, close back, and wind transport crank till it stops—no need to align arrows or markers. Unique 'feeler' mechanism positions first frame automatically.
- **Fast-Working Transport Crank.** A quick down/up motion of the fold-out crank advances film, winds shutter, and counts exposures. Double exposures are prevented by an automatic interlock with override for intentional multiple exposures.
- **Interchangeable Viewfinders.** Standard Rollei Folding Hood has flip-up 2.5X magnifier, interchangeable with six diopter lenses, incorporates built-in sportsfinder and magnifier for eye-level focusing. Accepts accessory Rollei *Pentaprism* for eye-level viewing and *Magnifying Hood*.
- **Split-Image/Microprism Focusing.** The brilliant finder screen incorporates a central split-image rangefinder surrounded by a microprism pattern for pinpoint focusing even in dim light.
- **Built-In Exposure Meter.** Accurate selenium-cell meter operates by simple match-needle action, accepts films ASA 12—1600; scale has special filter factor indicators for added convenience.
- **120/220 Film Capability.** Accepts either film type via simple adjustment.
- **Dual Format.** Accessory Rolleikin 35mm insert gives 24x36mm (vertical) format, includes transport and rewind knobs and frame counter.
- **Full Flash Provision.** Selector switch permits 'X' or 'M' synchronization at all shutter speeds including 1/500th second. PC outlet accepts Rollei-Lock or conventional PC cords.
- **Other Features.** All Rollei 2.8F and 3.5F cameras have a built-in self-timer, automatic depth-of-field indication, automatic parallax correction with all formats, cross-coupled aperture and shutter settings, and accept bayonet-mount filters and lens accessories. An extensive system of accessories is available.

Rolleiflex 2.8F with 80mm f2.8 Schneider Xenotar lens, angle of view 53°, measures 4 1/8 x 4 3/8 x 5 7/8'', weighs 44 oz.; Prod. No. 18704.

Rolleiflex 3.5F with 75mm f3.5 Schneider Xenotar lens, angle of view 56°, measures 4 x 4 3/8 x 5 7/8'', weighs 43 oz.; Prod. No. 18705.

# ROLLEI ACCESSORIES FOR ROLLEIFLEX TWIN-LENS REFLEX CAMERAS

## PENTAPRISM VIEWFINDER

For all present Rollei TLR's and all previous models with removable focusing hood. Gives upright, laterally-correct image at eye level. Weighs 14.5 oz.; with leather case. Prod. No. 18673.

## PENTA B EYEPIECE ATTACHMENT.

Permits eyeglass wearers to see entire finder screen with pentaprism. Prod. No. 18674.

## MAGNIFYING HOOD

Rigid construction provides complete shield against extraneous light; wide-range diopter adjustment for most comfortable, accurate focusing and viewing. With folding rubber eyecup. Prod. No. 18675.

## EYESIGHT CORRECTION LENSES

Gives added comfort, accuracy for eyeglass wearers in viewing and focusing with pentaprism or magnifying hood. +1, 2, and 3 for farsighted users; -1, 2, & 3 for nearsighted users.

## ROLLEI BAYONET FILTERS, CLOSE-UP LENSES AND LENS ATTACHMENTS

With front bayonet mounts for use in combinations. Bayonet size II for Rolleiflex 3.5F; Bayonet size III for Rolleiflex 2.8F.

	Filter/ Accessory Type	Bayonet II	Bayonet III
For Color Film	R1.5 (1A)	18616	18694
	UV (UV-16)	18707	18693
