### 35mm PROJECTORS ARE DESCRIBED IN OTHER LEITZ LITERATURE AND CATALOGS AVAILABLE FROM YOUR FRANCHISED LEICA DEALER

Your assurance that the Leica camera or lens you buy is a new one, is the Leitz Registration Card which identifies the equipment by serial number. On returning this card to E. Leitz, Inc., you will receive your Leitz Guarantee Certificate. Only a Franchised Leica Dealer can provide you with the Leitz Registration Cards. We cannot guarantee any camera or lens sold to you without a Leitz Registration Card, since it must be assumed to be second-hand equipment.

Prices and specifications effective January 1, 1969. Both are subject to change without notice.

## LEICA "M" CAMERAS

The Leica "M4" is the achievement of more than a third of a century of progress in the design of rangefinder 35mm cameras. Since 1925, when the introduction of the first Leica launched

the present era of 35mm photography, constant improvements have been added to make operation easier and success more certain.

### THE LEICA M4 HAS THESE ADVANCED FEATURES:

- Brilliant, single-window range- and viewfinder.
- Automatic Parallax correction.
- Accurate, rugged focal-plane shutter.
- One-stroke film-advance and shutter-wind lever.
- Single speed-setting dial with click-stops for speeds from 1 second to 1/1000th and B.
- **Automatic** flash synchronization for both conventional flash bulbs and electronic flash.
- Easy-fast position loading
- Cleverly designed "canted rewind-crank"
- View-finder image three quarter life size
- Full line of interchangeable lens.
- Rewind lever resets **automatically** to "advance" position as film is loaded.
- Built-in self-timer (up to 10 seconds delay).
- Accessory shutter-coupled exposure meter available.
- Accessory reflex housing available for long-lens and close-up work.
- Many other accessories for close-up, copying and photo-micrography available.
- Built-in, bright-line frames for four focal lengths; 35mm, 50mm, 90mm and 135mm
- Built-in exposure counter automatically resets itself to zero on reloading camera

<i>Catalog Number</i>	<i>Item</i>	<i>Retail Price</i>
10,400	Leica M 4 without lens . . . . .	\$309.00
10,402	Leica M 4 in black finish without lens . . . . .	339.00
10,405	Leica M 4 with 50mm Elmar f/2.8 lens. . . . .	390.00
10,406	Leica M 4 with 50mm rigid Summicron f/2 lens . . . . .	459.00
10,407	Leica M 4 with 50mm Summicron DR f/2 lens and optical viewing unit . . . . .	498.00
10,408	Leica M 4 with 50mm Summilux f/1.4 lens . . . . .	537.00

Leica M 4

## MDa & BLACK MODELS

LEICA MDa

### LEICA MDa

The Leica MDa is a camera designed for industrial, medical and scientific use with the Visoflex reflex housing, Micro-IBSO and other specialized attachments. It is similar in construction to the M 4 camera but lacks a rangefinder and viewfinder. Shutter speeds are from one to 1/1000th of a second, and the MDa accepts the lenses and accessories used with the other "M" Leica models.

#### Frame Identification

For laboratory use, the MDa permits frame identification to be printed on the negative at the same time the picture is made. This is accomplished by using a special baseplate (available as an accessory) which permits a transparent plastic strip to be inserted and positioned across one short edge of the film gate, in front of the film. Information marked on the plastic strip is thus printed on the negative when the exposure is made.

10,103	Leica MDa without lens and with standard baseplate	\$216.00
10,913	Leica MDa without lenses, with special baseplate #14,142	229.00
14,142	Special Baseplate for Leica MDa. Permits identification strips to be inserted into camera	24.00
14,131	Special Baseplate for Leica MD. Permits identification strips to be inserted into camera	19.00
14,132	Negative Marking Strips for use with special baseplate #14,131 & #14,142. Can be written on and positioned in front of film in camera for frame identification at time of exposure. Package of 100 strips	9.00

### CAMERAS, LENSES & ACCESSORIES AVAILABLE IN BLACK FINISH

To meet a limited but definite demand, certain Leica cameras, lenses, and accessories are now offered in a black as well as a chrome finish. These black-finish items will be available in limited quantities and on special order only.

The black cameras and lenses have white lettering and numerals except for the footage markings on the feet/meter focusing scales of the lenses. These are in red.

Catalog Number	Item	Retail Price
<b>CAMERAS IN BLACK FINISH</b>		
10,402	Leica M 4, black finish without lens	339.00
<b>LENSES IN BLACK FINISH</b>		
LENSES AVAILABLE IN BLACK ARE SO NOTED.		
<b>ACCESSORIES IN BLACK FINISH</b>		
14,218	Leica-Meter MR-4	57.00
14,124	Front Lens Cap, in black finish, for 90mm f/2 and 135mm f/2.8	3.00

## MOTOR DRIVE FOR LEICA M4

The Motor Drive enables the Leica Photographer to take sequence and/or single frame pictures with automatic shutter firing and instant film advance. Ideal for news, sports, industrial, science, technology, medicine, aviation, military and surveillance purposes. This motor is for all "M" model Leicas except the "M3".

<i>Catalog Number</i>	<i>Item</i>	<i>Retail Price</i>
98,701	Motor Drive for Leica M4 MOT.....	\$372.00
98,700	Motor Drive for Leica M2, M1, MD and MP Cameras (not for M3) .....	372.00
10,401	Leica M4, MOT Camera, black finish, modified to accept motor drive, catalog No. 98,701 .....	408.00
98,712	Remote Control Cord, a 15 foot cord with push-button switch and connector plug .....	9.00
98,713	Remote Control Cord, a 100 foot cord with push-button switch and connector plug .....	12.00

**Note:** E. Leitz, Inc. will modify Leica M2's, M1's, MD's and MP's to accept a Motor Drive when the camera requiring modification is accompanied by a Motor Drive or an order for one. Cameras requiring conversion should be sent to:

E. LEITZ, INC.  
PHOTO-REPAIR DEPT.

## BASIC CAMERA ACCESSORIES

Catalog Number	Item	Retail Price
14,217	Leica-Meter MR-4, battery operated with CdS cell and self-locking indicator needle. Has 27° angle of acceptance. Couples to speed dial of Leica "M" models. Complete with Mallory PX 625 "button" battery .....	\$51.00
14,218	Leica-Meter MR-4 in black finish, otherwise same as #14,217 .....	57.00
14,210	Leica-Meter MR same as #14,217 except it is designed for all M models except M4 .....	48.00
14,212	Leica-Meter-MR, in black finish otherwise same as #14,210 .....	54.00
14,215	Case for exposure meter MR .....	4.95
14,213	Case for exposure meter MR-4 .....	4.95
14,128	Mallory PX 625 battery for Leica Meter MR (as replacement) .....	0.75
14,526	Eveready Case for Leica M 4, M 3 or M 2 with 35mm "RF" lenses or 50mm Dual-Range Summicron, each with Optical Viewing Unit attached .....	27.00
14,528	Eveready Case for Leica M 4, M 3, M 2 or M 1 with Leica Meter MR attached and lenses through 50mm without Optical Viewing Unit or collapsible 90mm lens .....	24.00
14,094	Shoulder Grip for strap of Eveready case. Fits carrying straps up to 1/2" wide .....	1.05
14,260	Rapid Loading Spool with film positioning adapter for Leica cameras M 2, M 3, M 1 and MD (not for M 4, MDa, nor motorized cameras) .....	9.45
<p><b>Note:</b> Film positioning adapter supplied with the spool must be attached to base plate of the camera.</p>		
14,006	Film Magazine for all Leicas except 250 exposure model; with screw-cap plastic container .....	10.95
14,097	Bayonet Adapter actuating the 50mm viewfinder frame of the Leica M2, M3 and M4 .....	9.90
	For M3 with: All screw-mounting Leica lenses 50mm or less in focal length. For M2, and M4 with: All screw-mounting 50mm Leica lenses.	
14,098	Bayonet Adapter actuating the 90mm viewfinder frame of the Leicas M2 and M3 and M4 .....	9.90
	For M2, M3 and M4 with: All screw-mounting 90mm Leica lenses.	
14,099	Bayonet Adapter actuating the 135mm viewfinder frame of the Leica M3 and M4 and the 35mm frame of the Leica M2 and M4 .....	9.90
	For M3 with: All screw-mounting 135mm Leica lenses. For M2 with: All screw-mounting Leica lenses 35mm or less in focal length. For M4: All screw-mounting 35mm and 135mm Leica lenses.	

**Note:** Any of the above Bayonet Adapters can be used to attach 135mm screw-mounting lenses to the M2. Since a separate viewfinder must be used for this focal length on the M2, the bright-line frame which is actuated in the range-viewfinder is unimportant.

This is also true for adapting the screw-threaded Visoflex I to "M" Leicas, since viewing and focusing are done on the ground glass screen. (The screw-mounting Visoflex II cannot be adapted to bayonet-mounting cameras.)

## WIDE-ANGLE BAYONET LENSES

The versatility and popularity of the Leica System of photography have always been rooted in the large selection of interchangeable lenses available for it. The lenses below have bayonet mounts which fit the "M" series Leicas. Screw-mounting lenses for older Leicas, and lenses designed for use on Visoflex reflex housings will be found in other sections of this catalog.

Rangefinder-coupled lenses for the "M" Leicas are available in focal lengths from the extreme wide-angle 21mm to the long-focus 135mm. This group affords great control, both creative and technical, over the final picture. Through proper choice of lens, you can control perspective, bring distant scenes "closer," or work in small crowded areas, yet record all the important subject matter without the need to move back from it.

There is a Leica lens for every purpose. Some have the extremely high aperture of  $f/1.4$  for work under very poor light. One—the Dual Range 50mm Summicron  $f/2$ —can be focused as close as 19" without extra accessories. And the 135mm Elmarit  $f/2.8$  combines high speed with long focal length for situations which demand both from a lens. Still others are designed for all-around usefulness at modest cost.

Several of the longer focal lengths — particularly models of the 90mm and 135mm lenses — can also be used on the Visoflex II and III by means of adapters. This adaptation is especially useful for close-up and portrait work.

The longer focal length lenses, from 200mm to 560mm, which must be focused by a reflex system, are described in the section on the Visoflex housings.

Catalog Number	Item	Retail Price
11,103	21mm Super-Angulon $f/3.4$ in black finish, including special lens hood .....	\$285.00

1. Separate models for M3 and M2 or M4

2. Lens unit can be used on Visoflex II or III with adapters

\* 21mm lens focuses between minimum range-finder distances and 16", but range-finder does not function in this area.

# THE VISOFLEX SYSTEM

For Normal-Range Photography  
(Visoflex Close-Up Equipment Appears In The Close-Up Section)

## Combinations with the VISOFLEX III

Format given = object size at shortest focusing distance  
**Bold print** = normal working range  
 Normal print = black extension tubes: required for close-up and macrophotography

## REFLEX HOUSING VISOFLEX III

Experts acknowledge that no one method of focusing is best for all photo situations. For general photography with wide angle and normal lenses, the rangefinder system is faster and more accurate than a reflex camera. For extreme close-ups and telephotography, however, a reflex system is a "must."

And so the Leica System has for many years

made both focusing methods available in one camera by means of the Visoflex reflex housings. These accessories attach to the Leica body as quickly and easily as an ordinary lens and accept Leica lenses from 65mm to 560mm in focal length. (See chart on Page 1 Visoflex Section.) By adding extension tubes or a focusing bellows (or both), the Visoflex can be used for extreme close-up and scientific photography.

16,497

16,499

16,461

### VISOFLEX III

The Visoflex III is available for Leica "M" models only. It provides a selection of three mirror actions, any of which can be set quickly for best efficiency with varying types of photography:

- automatic quick-return, for sports or other action pictures
- soft upswing to minimize vibration for slow speeds and short time exposures
- mirror locked out of light path for long time exposures and scientific photography

A special lever-lock on the Visoflex III permits it to be attached to or removed from the camera even more quickly than a lens.

A 4X prism magnifier for eye-level use and a 5X straight magnifier for work with the camera below eye-level are available for the Visoflex III.

<i>Catalog Number</i>	<i>Item</i>	<i>Retail Price</i>
16,498	Visoflex III, bayonet mounting, with 4X magnifier . . .	\$168.00
16,497	Visoflex III, bayonet mounting without magnifier . . .	105.00
16,499	4X Eye-Level Magnifier for Visoflex III . . . . .	63.00
14,118	Correction Lenses for magnifier #16,499. Corrects for near- or far-sightedness. Prescription for eye to be used must be furnished with order. (Delivery 8 to 12 weeks.)	15.00
16,461	5X Standard Magnifier for Visoflex II or III . . . . .	42.00

# FOCUSING MOUNTS FOR VISOFLEX LENSES

## SHORT LENS MOUNTS

The lens units of certain rangefinder-coupled Leica lenses are removable. In special short mounts or adapters, they can then be used on the Visoflex and Bellows Focusing Device.

and remounted in long, rangefinder-coupled mounts, if desired.

What's more the lens units of some short-mounted lenses for the Visoflex can be removed

Mounts, and some adapters are listed below. Adapters and extension tubes which fit Leica lenses for close-up photography will be found in the Close-up Section of this catalog.

Catalog Number	Item	Retail Price
16,464	<b>Universal Focusing Mount.</b> Necessary with f/3.5 65mm on Visoflex II and 135mm Tele-Elmar f/4 or III. Also adapts lens unit of f/2.8 90mm Elmarit to Visoflex II or III. With extension tube #16,472 it adapts lens unit of f/4.5 135mm Hektor or Elmar f/4 to Visoflex II or III.	\$45.00
16,467	<b>Short Focusing Mount,</b> for lens unit of rigid f/4 90mm Elmar lenses above #1,572,401; permits focusing from infinity to 3'4" in Visoflex II or III.	21.00
16,462	<b>Universal Focusing Mount</b> in black finish accepts Lens Unit of 90mm f/2 Summicron or Lens Unit of 135mm f/2.8 Elmarit for use on Visoflex II or III	60.00

16,464

## RAPID FOCUSING DEVICE TELEVIT

14,136	<b>Televit Pistol Grip Rapid Focusing Device</b> for long focus lenses for use on Leica Cameras with Visoflex II and III. Has built-in filter slot for Series 7 filters.	387.00
14,137	<b>Iris Diaphragm Adapter</b> with preset diaphragm for Televit rapid focusing device. This will accept the lens heads of the new Telyt 400mm f/5.6 or Telyt 560mm f/5.6	102.00
14,138	<b>Bayonet Adapter</b> for using lens heads of Telyt 280 mm and the discontinued 400 mm f/5 on Televit Rapid Focusing Device	10.50

14,136

# VISOFLEX LENS ADAPTERS

## ADAPTERS FOR VISOFLEX II AND III

Catalog Number	Item	Retail Price
16,466	Adapter fitting bayonet on front side of Visoflex II with standard Leica thread, increasing extension length of Visoflex II to that of the Visoflex I and permitting use of short-mounted lenses of 125mm, 135mm†, 200mm, 280mm and 400mm focus .....	\$22.50
16,472	Adapter Tube. Adapts lens unit of 135mm† to Universal Focusing Mount #16,464. Permits the lens to be focused to infinity on the Visoflex II or III. Can also be used with #16,464 and extension tube #16,471 at distances from 38" to 26" .....	5.40
14,116	Three Filter Turret for use with short mounted 135mm†, 200mm, 280mm, and 400mm lenses on Visoflex II and III, replaces Adapter No. 16,466, accepts 3 filters size E43. Adapters required for series 6 filters. ....	57.00
14,117	Adapter Ring to use Series 6 filters in Filter Turret. ....	2.40
14,020	Extension Tube (15mm), fitting between 200mm Telyt and Visoflex for photography between 6 and 10 feet. .	4.50
14,024	Intermediate Collar (63.5mm) with special viewfinder shoe. Replaces Visoflex and adapter #16,466 when using 200mm or 400mm Telyt directly on Leica cameras having bayonet lens flange. Must be used with #12,035 or #12,037 and focusing of lenses is possible only by distance scale on lens mount .....	33.00
12,035	Sports Frame Finder for 200mm lens for use with Intermediate Collar .....	27.00

\*Removable lens units of certain other Leica lenses can also be used on the Visoflex with proper adapters. See other lens data chart and individual lens listings.

\*\*This lens head must be used with Televid pistol rapid focusing device #14,136 and diaphragm adapter #14,137. The lens heads do not have diaphragms or filter retaining rings. The filter slot for Series 7 filters is in the rapid focusing device.

# VIEW FINDERS AND LENS HOODS

## VIEWFINDERS

Viewfinder frames for lenses from 50mm through 135mm are provided automatically by the range-viewfinder system of the Leica M 3. In the M 2 the 35mm through 90mm lenses are provided for.

But with extreme wide-angle lenses, or with a rangefinder-coupled 135mm lens on the M 2, accessory finders are needed for accurate composition.

Leitz Optical Bright Line viewfinders slip into the camera accessory clip and outline the appropriate picture field with a brilliant white line. Parallax compensation is provided, except in the case of the 21mm finder.

The Sports Frame finders outline the subject area in an open frame. They are especially useful for making action pictures and for general sports work. The frame finders also provide for parallax compensation.

(Carrying cases for the viewfinders are listed with cases for other Leica equipment)

## OPTICAL FINDERS

Catalog Number	Item	Retail Price
12,002	Optical Bright-Line Viewfinder for 21mm lens .....	\$72.00
12,007	Optical Bright-Line Viewfinder for 28mm lens .....	45.00

## FRAME FINDERS

12,035	Sports Frame Finder for 200mm lens .....	27.00
--------	--	-------

## LENS HOODS

The purpose of a lens hood is to protect the clarity, contrast and brilliance which have been designed into your lenses. A lens hood keeps direct light rays — whether from the sun, flood or flash lamp — from hitting the front of the lens, causing internal reflections and loss of contrast in the picture.

Use a lens hood at all times — indoors and out — to keep picture quality high.

## LENS HOODS

12,501	Lens Hood for 21mm Super Angulon f/3.4 lens and 28mm Elmarit f/2.8 lens (as replacement) .....	12.00
12,585	Lens Hood for 35mm and 50mm lenses with 42mm front diameter, complete with plastic dust cap for use when lens is reversed for carrying and storage. Does not obstruct viewfinder .....	12.00

12,504	Lens Hood for 35mm Summilux with serial #2166701 and above (as replacement) .....	12.00
12,586	Lens Hood for all 50mm Summilux f/1.4 lenses (as replacement) .....	12.00
12,575	Lens Hood with clamping device for bayonet-mounting 90mm Elmarit, Tele-Elmarit and Elmar and 135mm lenses with 42mm front diameter .....	12.00
12,503	Lens Hood for 50mm Noctilux f/1.2 lens (as replacement) .....	13.50

# LENS AND BODY CAPS

## LENS PROTECTION COVERS

Scratched lens surfaces can spoil the definition and contrast of even the finest lenses. Lens covers are the best and most inexpensive protection available against dust, moisture and abrasion. Safeguard lens elements — both front and rear — whenever the lens is not in use.

Lens-opening covers are used to protect the camera body whenever it is stored or carried without a lens attached.

Catalog Number	Item	Retail Price
14,102	Front Lens Cap, Plastic, for 21mm Super Angulon f/3.4 28mm Elmarit f/2.8 and 50mm Noctilux f/1.2 lenses	\$ 1.65
14,078	Front Lens Cap, Plastic for 35mm f/1.4 Summilux lens with serial # below 2166701 (fits front lens flange not lens hood) .....	1.65

# CAMERA ATTACHMENTS

## CORRECTION LENSES

Special correction lenses are available for the eyepiece of the range-viewfinder of the Leica to correct the system for your individual eyesight, should you be one of the many who normally wear glasses. With such a lens, you can use your camera accurately and conveniently without using eyeglasses. Please provide a prescription for your "camera eye" when ordering correction lenses.

**Note:**  
Correction lenses are custom-made accessories and are available on special order only. Prescription for the eye used must be furnished when ordering. Delivery: 8-12 weeks.

Catalog Number	Item	Retail Price
14,061	Correction Lenses for Leica M2, M3 and M4. To correct near and far sightedness .....	\$ 10.00
14,062	Correction Lenses for Leica M2, M3 and M4. To correct astigmatism .....	15.00
14,063	Correction lenses for 4X and 5X magnifiers for Visoflex I and II. Corrects for near- and far-sightedness .....	10.50
14,118	Correction Lens for Visoflex III magnifier #16,499. Corrects for near- or far-sightedness. Prescription for eye to be used must be furnished with order .....	15.00

## MISCELLANEOUS ATTACHMENTS

A selection of small accessories adds extra fun and convenience to picture-taking. These attachments, whose functions are self-explanatory, help in various ways to make it easier for you to get the most from your Leica.

14,067	Cable Release (10 inches) with locking screw for bayonet-mounting Leica models .....	\$ 1.95
14,022	Take-Up Spool (marked "M") with pop-knob for Leica "M" models and I g and II g. (Unmarked spools cannot be used with the I g, II g) .....	3.90
14,260	Rapid Loading Spool with film positioning adapter for Leica cameras M2, M3, M1, and MD (not for M4, MDg or motorized cameras) .....	9.45
	<b>Note:</b> Film positioning adapter supplied with the spool must be attached to the baseplate of the camera.	
14,092	Adjustable Neck Strap for all Leicas .....	2.10
14,100	Table Tripod without ball-and-socket head .....	10.50
14,119	Ball-and-Socket Head, small .....	10.50
14,121	Ball-and-Socket Tripod Head, large rigid construction, with interchangeable adapters for European and ASA Tripod threads .....	21.00
14,130	Adjustable Heavy Duty Shoulder Strap with two tripod screws for use with camera and equipment with tripod screw receptacle .....	9.60
98,206	Benser Base Plate Lens Holder for all Leica "M" cameras. Holds two bayonet-mount Leica lenses (21mm lens requires adapter 16,469). Fits camera base plate, matte chrome finish .....	39.00
14,054	Synchro Outlet Cover for Leica Cameras MD, M1, M2, and M3 .....	.30

98,362	Same as #98,361 but has 8" coiled section extending to 48" .....	5.10

## LEICAFLEX CAMERAS

The Leicaflex and the Leicaflex SL answer the demand for a system of single-lens reflex photography which has the same superb quality and the Leica rangefinder system. The Leicaflexes are eye-level 35mm reflex cameras featuring a virtually vibration free, instant return mirror, and rapidly interchangeable auto-aperture lenses that remain wide open when focusing and viewing, closing down to a preselected aperture as the picture is taken, and reopening instantly.

### LEICALEX SL

The Leicaflex SL is the new model that incorporates through-the-lens light measurement, full field focusing, depth-of-field preview button and rapid almost automatic film loading. The Leicaflex SL can not be motorized. However late in 1968 the Leicaflex SL/MOT, a motorized version, will be available.

- 1/2000 of a second shutter speed
- Electronic flash synchronization up to 1/100 of a second
- Automatic resetting counter-counts backwards when rewinding
- ASA speeds 8-6400 coupled to the meter

### LEICAFLEX

The Leicaflex is a less expensive model offer-

ing Leica quality with these features:

- Brilliant viewfinder and accurate focusing system
- 1/2000 of a second shutter speed
- Automatic resetting counter
- Electronic flash synchronization up to 1/100 of a second
- Built-in external coupled CdS meter

### ELPRO CLOSE-UP LENSES

The Elpro close-up lenses for the Leicaflex are two-element achromats especially designed for the prime lenses with which they are used. They are threaded into the front of the basic lens.

The Elpros retain the superb performance of the Leicaflex lenses in the close-up area and also permit the automatic diaphragm of the lenses to function. And, since they require no bellows extension, Elpro-close-up photography requires no increased exposure factors.

### LEICA-TO-LEICAFLEX LENS ADAPTER

A Leica-to-Leicaflex adapter will permit the use on the Leicaflex and the Leicaflex SL lenses designed for the Leica Visoflex. It will also permit the use of the Leica Bellows II on these cameras.

### LEICAFLEX CAMERAS

Catalog Number	Item	Retail Price
10,011	Leicaflex SL, without lens .....	\$483.00
10,012	Leicaflex SL, in black finish, without lens .....	516.00

# LEICAFLEX & LENSES

## LEICAFLEX LENSES

The Leicaflex lenses listed below are, with the exception of the 21mm, Catalog Number 11,803 for use on both model cameras — the Leicaflex and Leicaflex SL. See note below regarding modifying the previously offered Leicaflex R lenses for use with the Leicaflex SL.

Catalog Number	Item	Retail Price
11,803	21mm Super Angulon-R f/3.4 with lens hood. Uses Series 8 Filters in lens hood. This lens must be used with Optical Viewfinder #12,002 and cannot be used on the Leicaflex SL .....	\$303.00
12,002	Optical Viewfinder for 21mm lens #11,803 .....	72.00
11,813	21mm Auto-Aperture Super Angulon-R f/4 lens. Its retrofocus design permits viewing and focusing through the lens .....	360.00
11,201	35mm Auto-Aperture Elmarit-R f/2.8, complete with Series 6 Filter Retaining Ring, reversible lens hood and lens cap .....	213.00
98,000	45-90mm Angenieux-R f/2.8 lens, black finish, complete with lens hood that accepts series 8 filters .....	597.00
11,228	50mm Auto-Aperture Summicron-R f/2, complete with Series 6 Filter Retaining Ring, reversible lens hood and cap .....	180.00
11,239	90mm Auto-Aperture Elmarit-R f/2.8, complete with Series 7 filter Retaining Ring, built-in collapsible lens hood and lens cap .....	246.00
11,211	135mm Auto-Aperture Elmarit-R f/2.8, complete with Series 7 Filter Retaining Ring, built-in collapsible lens hood and lens cap .....	282.00
11,919	180mm Auto-Aperture Elmarit-R f/2.8 lens with collapsible lens hood and lens cap and Series 8 Filter Retaining Ring .....	399.00

## FORMER LEICAFLEX LENSES

The Leicaflex lenses previously offered do not properly activate the follow-pointer of the meter in the viewfinder, in the Leicaflex SL. These lenses may be modified to work with the Leicaflex SL.

## LEICA LENS ADAPTER

Note: The Leica lens adapter listed below carries a star designation after the catalog number. It can be used on both the Leicaflex and Leicaflex SL. The diaphragm simulator in this adapter is only used with the Leicaflex. It has no function when used with the Leicaflex SL. The adapter previously offered without the star does not properly activate the meter of the Leicaflex SL. The previous adapters without the star can be modified for the Leicaflex SL.

14,127*	Lens Adapter, adapts Leica lenses for Visoflex II and III as well as Bellows II to Leicaflex and Leicaflex SL. Lenses which require Adapter #16,466 for use on Visoflex II or Visoflex III will also require it for use with this Leicaflex lens adapter .....	36.00
---------	--	-------

Focusing data are given for ∞ and the shortest engraved distance setting of the Leicaflex lenses. Since the lenses can slightly exceed these engraved settings, somewhat higher reproduction ratios can be obtained than are shown in this table. All figures are approximate, having been rounded off for convenience.

Catalog Number	Item	Retail Price
14,134	Divisible extension ring for close-up photography with Leicaflex and Summicron-R 50mm lens (object to film distance 8½ to 9 1/4 inches, ratio 1:1.63 to 1:2.08) .....	\$22.50
	(This consists of 2 rings, one which accepts the lens and other which fits into the camera. The latter rings must have a star engraved on it for use on the Leicaflex SL. Previous rings without the star can be modified for the Leicaflex SL.)	
14,135	Extension Tube for 14,134 increasing lens extension so as to focus as close as 7 1/4" ratio 1:1 (fits between two parts of ring 14,134) .....	6.00
14,139	Divisible extension ring set, complete (14,134 and 14,135) .....	28.50

**NOTE:** ELPRO lenses Via and Vib can be used on the 50mm Summicron-R lens, in addition to the extension rings to further reduce the working distance. Maximum ratio obtainable with ring plus ELPRO Vib combination 1.25:1.

14,139

## CARRYING CASES

Catalog Number	Item	Retail Price
14,555	Eveready Carrying Case, brown leather, for Leicaflex and Leicaflex SL with 35mm or 50mm lens attached and lens hood reversed.....	\$29.70
14,809	Universal Carrying Case III, with Insert III and coupling ring # 98204 for Leicaflex and Leicaflex SL equipment, accommodating the following: 1 - a 90mm lens, coupled with a 35mm or a 50mm lens with lenshood and lens cap, 2 - a 135mm lens, coupled with a 50mm or 35mm lens with lenshood and lens cap, or one 180mm lens, 3 - a Leicaflex with a 35mm or 50mm lens attached, with lenshood and lens cap, 4 - four Elpro close-up lenses, each in its leather case, 5 - other accessories .....	81.00
98,204	Coupling Ring holds 2 Leicaflex lenses back to back for storage in carrying case .....	2.25
14,815	Universal Carrying Case III without insert .....	52.50
14,819	Insert III for Universal Carrying Case III. Holds equipment described in Cat. #14,809 above .....	28.50
14,822	Leicaflex Combination Case, accommodating the following: A Leicaflex or Leicaflex SL Body with a 35mm, 50mm or 90mm lens in position. Also one 90mm or 135mm lens, coupled with 35mm or 50mm lens, or one 180mm lens. Below the Leicaflex with lens in position the following can be accommodated: A 50mm lens or Elpro close-up lenses or filters in containers or films. ....	43.50
14,094	Shoulder Grip for strap of Eveready case. Will fit carrying straps up to 1/2 inch wide .....	1.05
98,094	Shoulder Grip for strap of Universal Case .....	1.05

## LENS CASES

14,616	Plastic Case for 35mm Elmarit-R f/2.8 or 50mm Summicron-R f/2 lens .....	2.70
14,618	Plastic Case for 90mm Elmarit-R f/2.8 lens .....	3.60
14,619	Plastic Case for 135mm Elmarit-R f/2.8 lens .....	3.60

## COPYING STAND

16,707	Copying Stand, baseboard 18x19 3/4", upright 31 3/4" high with parallel guide, carrying arm with coarse and fine adjustment, accepting all Leica cameras with Visoflex II (with or without Leica Bellows Device II), Leica "M" cameras with Visoflex III (with or without Leica Bellows II), Leicaflex and Leicaflex SL with or without Bellows .....	93.00

# EXPOSURE METERS

One of the most important secrets of successful photography is correct exposure. And the best way to guarantee proper exposure is to use a photo-electric exposure meter.

Great accuracy and convenience are provided by the Leica-Meter MR-4, which couples to the shutter speed dial of Leica "M" models. It sets the correct shutter speed automatically as you line up the exposure dial for a preselected f/stop. The Leica-Meter MR-4 features a cadmium sulphide photo resistor with extreme sensitivity and has an angle of view which matches that of a 90mm lens. Thus, you can see exactly which part of the scene the meter is "reading" by looking through the 90mm bright-line frame of the Leica viewfinder.

The Metrastar CdS meter, made by Metrawatt of Nuernberg, W. Germany who also make the Leica-

Meters, is an ultrasensitive, hand-held meter. It features a narrow (18°) measuring angle and a built-in reflex viewfinder to insure maximum accuracy in aiming the meter and reading the most important subject areas. Its extreme sensitivity range handles exposures at light levels ranging from moonlight to sunlight on the beach, by either the reflected or incident light method. A direct-reading dial provides fast, one-hand operation.

The Leica-Meter 3 is a small and handy selenium-cell meter which can be slipped into the accessory shoe of any Leica (and most other cameras) but which does not couple to the shutter dial. It can also be carried and used off the camera, and comes with a carrying chain and retainer plate for off-camera use. An accessory booster cell can be used to increase the meter's sensitivity for low-light use.

## LIGHT METERS

Catalog Number	Item	Retail Price
14,217	<b>Leica Meter MR-4</b> , battery operated with CdS cell and self-locking indicator needle. Has 27° angle of acceptance. Couples to speed dial of Leica "M" models. Complete with Mallory PX 625 "button" battery .....	\$51.00
14,218	<b>Leica-Meter MR-4</b> in black finish, otherwise same as #14,217 .....	57.00
14,210	<b>Leica Meter MR</b> same as #14,217 but couples to all M models but M4 .....	48.00
14,250	<b>Metrastar CdS Meter</b> . Ultrasensitive, handheld exposure meter with extremely wide measuring range. Has selective 18° acceptance angle and matching built-in viewfinder for accurate aiming and reading. Battery operated, one-hand operation. Complete with brown leather eveready carrying case, 43" flexible metal carrying chain and Mallory PX 625 button battery .....	52.50
14,231	<b>Leica Meter 3</b> with booster cell, incident light attachments, retainer plate, carrying chain. Eveready case for meter and case for booster cell .....	27.00
14,230	<b>Leica Meter 3</b> without booster cell, but with incident light attachment, retainer plate, carrying chain and Eveready case .....	21.00

14,012	<b>Shoe</b> for mounting Leica Meters (except models "M", "MC", "MR" and "MR-4") on cameras of larger size ....	1.65

A filter, properly used, is a creative optical tool which can lift your pictures out of the ordinary and infuse them with drama. But, like a quality lens, a filter must be precise, made — from finest optical glass, carefully ground and polished. Most important of all, it must be thin, with plane-parallel surfaces to avoid disturbing the high correction of the camera lens. A cheap, poorly made filter can cancel out the skills of

even the finest lensmakers.

Leitz filters for black-and-white photography are made from solid optical glass and ground thin (average: .066") to produce maximum sharpness. Polarizing and color-photography filters are laminated. This must be done to achieve the precise transmission characteristics necessary for color work.

## BLACK-AND-WHITE FILTERS

Generally speaking, filters for black-and-white photography are used to control contrast and the rendition of colors as tones of gray in the final print. Scene colors complementary to that of the filter are rendered dark on the final print. Colors similar to that of the filter become a lighter gray than they would otherwise be. Thus, a yellow filter renders blue skies as a darker gray than they would be in a photo made without the filter. Orange and red filters act like the yellow filters but with increased effect, the red producing nearly black skies in a print.

A special filter like the infra-red is too dark for

use with ordinary film and are used only with films sensitive to infra-red. The UVa filter is used to reduce the effect of ultra-violet. All film is sensitive to these short wavelengths of light; without a filter, pictures made of distant scenes, or at high altitudes, lose contrast, because of scattered ultra-violet light. Other filters also absorb ultra-violet, but the UVa is colorless and needs no extra exposure.

The blue filter is used principally for copying to darken yellowed, faded writing or photographic images and thus to restore contrast. It has little use in general photography.

## COLOR FILTERS

Filters for color photography are of two general types: correction filters and conversion filters. The former are used to correct excess redness or bluishness when the light source is other than that for which the film is balanced. For instance, a picture made by the light of a clear flash bulb on Type "A" Kodachrome (which is balanced for photoflood lamps) would require a Leitz "Flash" filter to correct the relatively bluish flashlight to the response of the Type "A" film.

Conversion filters "convert" the light for use with film normally intended for use under different lighting conditions. An example of this would be the use of the Leitz Type "A" filter

when Type "A" film is used outdoors in daylight. Leitz filters for color photography are:

### Conversion:

TYPE "A": Used with Kodachrome Professional Type "A" film for photography outdoors in daylight.

PHOTOFLOOD: Used with daylight type films when the light source is photoflood bulbs.

### Correction:

FLASH: Used when Type "A" film is exposed by clear flash bulbs.

SKYLIGHT or UVa: Used with daylight color films to absorb excessive blue found at high altitudes, at the shore and in open shade.

## POLARIZING FILTERS

Polarizing filters can be used for either color or black-and-white photography, since they are neutral in color.

With a polarizing filter, you can minimize or

even eliminate reflections from the surfaces of water, show windows, furniture, etc. This type of filter is the only one which will darken the blue sky in color photographs without altering the color or tone in the rest of the scene.

14,165	Filter Retaining Ring for Leica, Leicaflex and Leicina lenses, accepting series 8 filters .....	7.50

## CLOSE-UP PHOTOGRAPHY

Close-up photography helps you to explore the world of the very small which is otherwise beyond the powers of the human eye.

We can divide close-up photographs into two groups: those taken with and without a microscope. Photography with the aid of a microscope (which in this application replaces the camera lens) is called photomicrography.

The normal minimum focus of most Leica lens mounts is 3½ feet or more, which limits their application to close-up work. However, much close-up photography can be done simply and conveniently with the 50mm Dual-Range Summicron lens, since it has a second, close-focusing range down to 19 inches, with focusing and framing done through the camera's range-viewfinder.

The Visoflex and the 65mm lens in the Universal Focusing Mount are an extremely simple and flexible combination for close-up work. Focusing and framing are done on the ground glass of the Visoflex and the focusing range is from infinity down to a 1:1 ratio of reproduction. Simple

extension tubes can extend the close-up range still further.

The Visoflex with the Bellows II, however, combines simplicity with extreme versatility. It offers continuously variable extra lens extension through a great focusing range, with ground-glass focusing and framing. A choice of adapter rings permits the use of most Leica lenses or lens units on the Bellows. Lenses from 65mm to 200mm (in proper adapters) will focus from infinity to the close-up range. Shorter focal lengths can be used with the bellows only in the close-up range.

Also available for the Visoflex are close-up adapters which are used with certain lens units directly on the reflex housing without the bellows.

Still other accessories for close-up and copying photography are available, providing various degrees of versatility. Some are used with the range-viewfinder system of the camera; others require groundglass focusing and framing. Still others provide fixed ratios of reproduction and areas of coverage and need not be focused visually at all.

### VISOFLEX CLOSE-UP ACCESSORIES

The Visoflex is a prime tool for close-up photography with the Leica. Used with the Bellows, it is both convenient and versatile, not only for close-up photography, but, with most Leica lenses, for general photography as well.

The lens units of Leica lenses from 65mm to 200mm (except the 135mm Elmarit and 90mm Tele-Elmarit and Summicron) will focus in the Bellows from infinity down to ratios as large as 1.4:1, in the case of the 65mm lens.

For extreme close-ups within a limited range of focus, lenses of shorter focal length can also be adapted for use on the Bellows.

The Bellows is extremely rigid, and features backlash-free rack-and-pinion focusing. A second geared motion shifts Bellows and camera as a unit so that fine focusing can be done

without changing the image-or field-size on the negative.

An engraved data-scale shows reproduction ratios and corresponding exposure increases for the 90mm Elmarit or Elmar lens heads. A second scale shows the actual Bellows extension in millimeters.

An accessory bellows-type lens hood is available which attaches to the lens flange in the same way as an ordinary Leica lens hood.

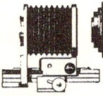

Also available for the Visoflex are a number of simple and inexpensive extension tubes which are used with certain Leica lenses to extend focusing into the realm of close-up photography. They do not require the use of the Bellows, and so, necessarily, do not offer as wide a focusing range as does the Bellows.

(The Visoflex is listed in a separate section of this catalog.)

# VISOFLEX CLOSE-UP; BELLOWS II

## VISOFLEX CLOSE-UP ADAPTERS AND

(The Visoflex is listed in a separate section)

Catalog Number	Item	Retail Price
16,464	 Universal Focusing Mount. Necessary with f/3.5 65mm lens on Visoflex II or III. Also adapts lens unit of 90mm Elmarit f/2.8 and 135mm Tele-Elmar f/4 to Visoflex II or III. With extension tube #16,472 it adapts lens unit of 135mm Hektor f/4.5 or f/4 Elmar to Visoflex II or III .....	\$45.00
16,471	 Extension Tube for lens unit of 90mm Elmarit f/2.8, 135mm Tele-Elmar f/4 and 65mm Elmar f/3.5 lens. Fits Universal Focusing Mount #16,464 and adapts these lenses for extreme close-up photography. With Adapter Tube #16,472 it can also be used with the lens unit of the 135mm Elmar .....	6.00
16,469	 Tube to thread into Bellows II, permitting use of the lens-heads of the 135mm Elmar or Hektor on Bellows II .....	6.00
16,469	 Extension Tube. Bayonets to front of Visoflex II or III; accepts bayonet-mounting Leica lenses (except short-mounted 90mm Summicron) for close-up photography .....	12.00
16,468	 Extension Tube for Short Focus Mount #16,467 (see Visoflex section) permitting focusing 90mm f/4 lens unit from 3'4" to 2'2" .....	3.00
16,474	 Extension Tube for short mounted 90mm Summicron f/2 lens for photography between 3'6" and 1'9" .....	5.40
<b>FOCUSING BELLOWS II</b>		
16,556	 Focusing Bellows II, with Adapter Ring for lens units of the 90mm Elmarit or Elmar, 65mm Elmar and 135mm Tele-Elmar .....	117.00
16,557	 Bellows-type Lens Hood for Focusing Bellows II and Leica lenses with 42mm (E 39) front diameter .....	31.50
13,154	 Adapter Ring for using bellows-type lens hood with Leica lenses having 36mm (A 36) front diameter ....	5.40
16,596	 Adapter Ring for fitting bayonet-mounting 35mm and 50mm Leica lenses to Bellows II .....	10.80
16,590	 Adapter Ring for fitting screw-mounting 35mm and 50mm Leica lenses to Bellows II .....	4.80
16,580	 Special Extension Tube fitting 135 mm lens unit (except Tele-Elmar) to Adapter Ring #16,590 .....	4.50
17,672	 Adapter fitting lens units of 50mm Dual-Range and rigid-mount Summicron lenses to Bellows. Used with Adapter Ring #16,590 .....	3.60
16,558	 Adapter Ring for fitting lens-heads of the 135mm Tele-Elmar, 90mm Elmarit or Elmar, and the 65mm Elmar to Bellows II. (This ring is supplied with the basic outfit) .....	6.30
16,598	 Adapter Ring for fitting lens-heads of the 90mm Summicron, 135mm Elmarit f/2.8 and 200mm Telyt f/4 to Bellows II .....	5.40

(The Visoflex and its lens mounts are described and listed in another section.)

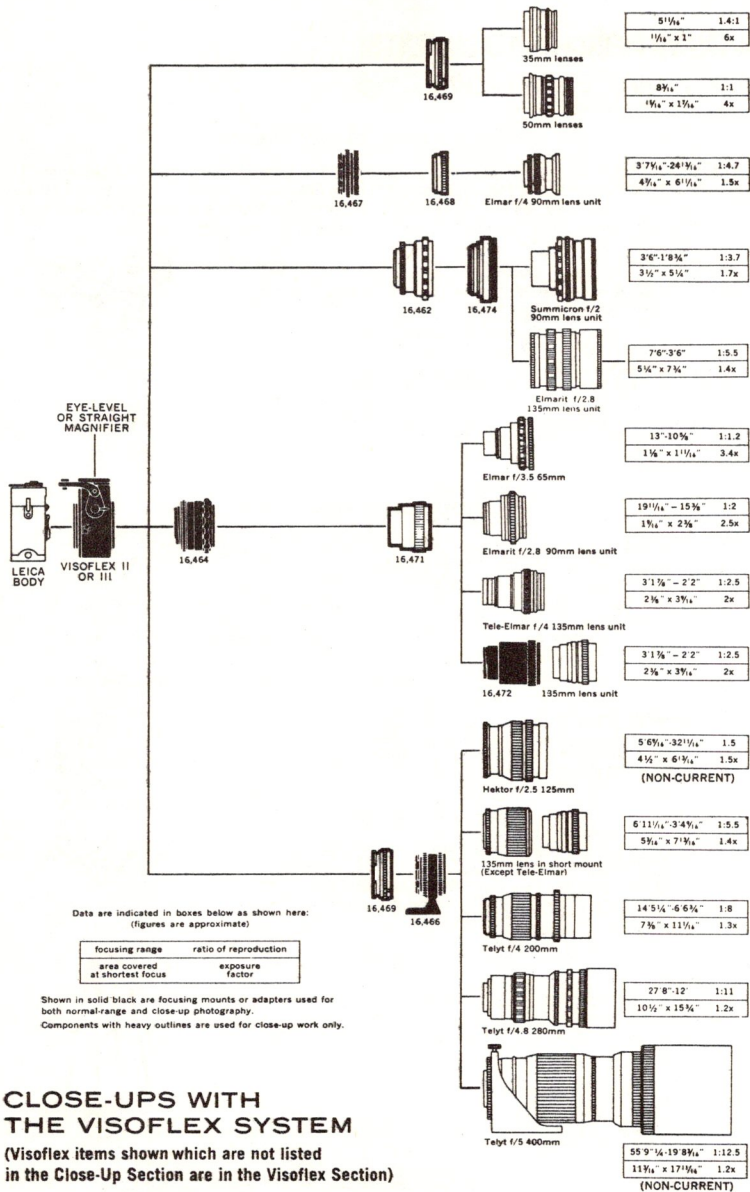

## THE EXTREME VERSATILITY OF THE FOCUSING BELLOWS II

THIS CHART indicates the major combinations possible with this ultra-compact reproduction unit. Even greater image-magnifications than those indicated for the various lenses may, for example, be obtained by employing additional standard LEITZ extension-tubes. An ideal device for general copying and extreme close-up applications, the Focusing Bellows II provides both the precision required by technical and scientific workers and the simplicity of operation desired by the amateur.

<b>Reproduction Ratio (image/object)</b>	from 2.1:1 to 4.8:1	from 1.4:1 to 3.2:1	from 1.7:1 to 4.4:1	from 1.1:1 to 3.0:1	from 0 to 1.4:1	from 0 to 1.0:1	from 0 to 1.0:1.4	from 1.0:20 to 1:1:1	from 0 to 1.0:1.7	from 0 to 1.0:1.4	from 1:1:7 to 1:1:2.5	from 0 to 1:3

The above figures have been rounded off for simplicity and are offered only for purposes of comparison.

## CLOSE-UPS WITH THE VISOFLEX SYSTEM

(Visoflex items shown which are not listed in the Close-Up Section are in the Visoflex Section)

# RANGE-VIEWFINDER ATTACHMENTS; COPY STANDS, FIXED RATIOS

## RANGE-VIEWFINDER ATTACHMENTS

The Close-Focusing Device provides most 50mm Leica lenses with the focusing capabilities of the Dual-Range 50mm Summicron. Mounted in it, Summicron or Elmar 50mm lenses

focus down to 19 inches. At the same time, optical components of the accessory adapt the range-viewfinder system to permit focusing and framing in the close-up range.

Catalog Number	Item	Retail Price
16,507	Close Focusing Device, bayonet-mounting; accepts bayonet-mounting collapsible 50mm lenses, and screw-mounting 50mm Elmar f/2.8. Focusing range from 2' 10.5" to 19" with ratios of reproduction from 1:15 (14" x 21") to 1:7.5 (7" x 10.5") .....	\$49.50
16,508	Adapter fitting lens unit of rigid-mount Summicron to Close Focusing Device #16,507 or Auxiliary Reproduction Unit #16,526 .....	4.80
16,509	Close Focusing Device #16,507, complete with Adapter #16,508 for use with lens unit of rigid 50mm Summicron .....	54.30

16,507

16,508

## COPY STANDS, FIXED RATIOS

The Auxiliary Reproduction Unit and the Universal Copying Stand are designed to do photographic copying work at various, fixed ratios of reproduction. Subject area is clearly delineated by each of the units and focus is determined by the use of appropriate extension tubes and

camera-height positions.

These close-up devices can also be used to photograph small objects, either in the studio or the field. Easily disassembled, they fit conveniently into a gadget bag for travel.

Catalog Number	Item	Retail Price
16,511	Universal Copying Stand for 1:1, 1:1.5, 1:2, and 1:3 ratios. Adjustable in height with bracket for camera. Complete with 4 extension tubes, 3 field masks, 5X magnifier with ground glass housing to check focus. Accepts any bayonet-mounting or screw-mounting Leica and any 50mm Leica lens .....	57.00
16,526	Auxiliary Reproduction Unit, bayonet-mounting, for bayonet-mounting Leica cameras. Accepts bayonet-mounting collapsible 50mm lenses, screw-mounting collapsible 50mm Summicron and Elmar f/2.8 and with adapter #16,508 the lens unit of the rigid or Dual-Range Summicron. Ratios of reproduction 1:4, 1:6 and 1:9 areas covered 4 1/8" x 5 3/4", 5 3/4" x 8 1/4" and 8 1/4" x 11 1/8" .....	60.00

16,511

16,526

## COPY STANDS, VARIABLE RATIOS

Ordinary close-up work can be done from a regular or a table top tripod. But copying work, either in quantity, or when exact ratios and areas of reproduction are involved, is best done from a copying stand.

A copy stand includes a sturdy base, an upright and a movable carrying arm which holds the camera exactly parallel to the baseboard. Variable ratios of reproduction are achieved by raising or lowering the camera on the upright.

**Focomat 1c  
Copying Stand**  
(Including Carrying Arm)

Accessory carrying arms can be added to certain Leitz enlargers (after removing the enlarger head) to make excellent copy stands. Or, such copying stands may be purchased complete and used for enlarging later by adding an enlarger head.

For those who do a great deal of copy work, a special instrument is recommended — the Reprivit Ila.

### FOCOMAT 1c COPYING STAND

Catalog Number	Item	Retail Price
17,619	Focomat 1c Copying Stand, standard, baseboard 16 x 21" and upright, 40mm diameter, 32" high does not include carrying arm 17,624 .....	\$78.00
17,624	Carrying Arm for upright or Focomat 1c; converts enlarger to copying stand; supplied with angular alignment adapter; accepts Visoflex III or II (with adapter), Bellows II or I (without adapter), Rack and Pinion Fine Adjustment for Focoslide or Bellows (with adapter), or Focoslide (with adapter) .....	22.50

### LEICA-LEICAFLEX COPYING STAND

16,707	Copying Stand, baseboard 18x19¾", upright 31¾" high with parallel guide, carrying arm with coarse and fine adjustment, accepting all Leica cameras with Visoflex II (with or without Bellows Device II), Leica "M" cameras with Visoflex III (with or without Bellows II), Leicaflex with or without Bellows .....	93.00
--------	--	-------

# REPROVIT IIa

The Reprovit IIa is a universal copying tool, suitable for very nearly any kind of photographic reproduction work in quantity. Yet, despite its remarkable adaptability, sophistication and precision, it is so simple to use that even beginners produce high-quality work quickly and accurately with it.

The Reprovit IIa features:

- Continuous focusing range providing ratios of from 1:19 (18" x 27") to 1:1 (1" x 1½")
- Electrically-controlled exposures to 60 sec.

- Electro-magnetic shutter release to eliminate vibration
- Four-lamp illumination for even, glare-free subject lighting
- Exact outlining of subject area by illuminated rectangle
- Special accessories available, such as framing boxes for copying thick originals (books), special lenses and carrying stages to produce magnified images of small originals (transparencies), etc.

## REPROVIT IIa

Catalog  
Number  
16,789

Item

**Reprovit IIa Reproduction Outfit** for "M" series Leica cameras. For recording both flat originals, either opaque or transparent, and solid objects at reproduction ratios of from 1:19 to 1:1, using the 50mm Repra Focotar lens. Consists of copying stand, focusing stage with bellows and rack-and-pinion adjustment, diaphragm lever and operating guide, projection head with electromagnetic camera release, automatic electric interval timer, four-lamp illuminator, 50mm Repra Focotar f/4.5 lens, and line cord. For 110v A.C. operation only .....

# PHOTOMICROGRAPHY WITH THE MICRO IBSO

The Micro Ibsso attachment makes it simple and convenient to use the Leica for photomicrography. With this precision device, the Leica offers many advantages — among them; film economy, short exposures, and the ability to observe the specimen while the equipment is in place on the microscope and even while making the actual exposure.

The Micro Ibsso replaces the lens on your Leica. The attachment and camera are then connected to the draw-tube of any standard microscope. The Micro Ibsso has its own "X"-synchronized Ibsso shutter (1 to 1/125th, "T" and "B") to

eliminate vibration at high magnifications and comes with a 10X PERIPLAN ocular. The swing-out prism passes 25% of the light through the viewing telescope, which is focused on cross hairs for your individual eyesight. When the image is in focus on the groundglass of the Micro Ibsso, it is also sharp in the film plane of the camera.

The interchangeable conical tube of the Micro Ibsso has a correction lens with a magnifying factor of  $\frac{1}{3}X$  or  $\frac{1}{2}X$ . These produce a magnification on the film that is  $\frac{1}{3}$ rd or  $\frac{1}{2}$  that seen by the eye through the microscope.

# PROCESSING EQUIPMENT

## BULK LOADING EQUIPMENT

By bulk-loading your own film into Leica magazines, you can cut film costs to a minimum. What's more, you can enjoy the use of many interesting films which are normally not avail-

able in standard 35mm cartridges. Several precise, convenient accessories, which make bulk-loading a simple process, are offered as a part of the Leica System.

Catalog Number	Item	Retail Price
14,006	Film Magazine for all Leicas except 250 exposure model; with screw-cap plastic container .....	\$10.95
14,001	Film Magazine 14,006 but without container .....	10.20
14,010	Plastic Container with screw-cap for Film Magazines.	.75
14,015	Center Spool for Film Magazines .....	2.70
17,101	Hand Film Winder for loading bulk film into magazines.	1.80

## RONDINAX DEVELOPING TANK

By processing your own films, you guarantee that they get careful development. What's more, you can choose from among scores of developers, experiment, exercise creative control over your negatives every step of the way.

The Rondinax tank is made from strong, shock-resistant plastic, which helps to maintain an

even processing temperature during development.

It is a daylight-loading tank. You can use it without a darkroom, process on the go during vacations or while traveling, and be sure that you have the pictures that you want.

# FOCOMAT 1c

Only by making enlarged prints can you bring out the full beauty and rich detail of a Leica negative. But it is vital that your enlarger be as precise as the Leica itself. A poorly made enlarger or a questionable enlarging lens can destroy the potential of even the most highly corrected camera lenses.

So, Leitz enlargers are designed especially for use with 35mm negatives. They are precisely made, in the same factory as the camera itself, to rigid optical and mechanical standards. Special enlarging lenses, corrected for close-distance work, are available for the enlargers, or you may use your camera lens, if you prefer.

## FOCOMAT 1c AUTOFOCUS ENLARGER

The Focomat 1c can be set in an instant and is autofocus through a range of 2 to 10 diameters; you can make larger prints by focusing manually. The autofocus cam is adjusted precisely to each individual lens you use in the enlarger, assuring critical focus throughout its range. The baseboard (16 x 21 inches) has a built-in light switch, a quick clamping device to lock the easel in position, and an upright 32 inches high, 40mm in diameter. You raise or lower the

springcounter balanced lamp housing by a self-locking finger grip. The degree of enlargement shows on a scale. The housing can be tilted for easy cleaning of the surface-treated, anti-Newton's Rings condenser. You can also use the baseboard and upright of your Focomat 1c as a copying stand by using one of the carrying arms described in the section on Close-Up Photography.

# PUBLICATIONS

Few photographers can be expert in all of the many aspects of Leica work. But, through books, the experience and advice of these outstanding experts are available to help you to greater enjoyment of our photography.

In addition to books, there are the inspiring pictures and articles and the lively reports of new materials, techniques and products found in the magazines "Leica Photography" and "Leica Fotografie". These bring you regularly the best current work from all over the world, presented exclusively in terms of the Leica and its accessories.

Leica Photography is published by E. Leitz, Inc., New York. For details, write to:

Registration Department  
E. Leitz, Inc.  
468 Park Ave. S.  
New York, N. Y. 10016

An English edition of the German bi-monthly Leica Fotografie is distributed in the U.S. and its possessions by E. Leitz, Inc. Subscription prices are:

1 year (6 issues) .....	\$ 4.50
2 years (12 issues) .....	8.25
3 years (18 issues) .....	12.00

**Note:** When you order Leica Fotografie, please order it separately and not with merchandise. This will expedite its delivery.

## BOOKS

More books have been published, in English and foreign languages, on the Leica and its use than on any other camera. The more outstanding of these are listed here.
